

# OXY PEEL

HYPERPIGMENTATION

This gentle, no downtime peel combines 20% AHA's with Nonapeptide-1; a peptide complex of nine amino acids that helps brighten skin tone, reduce dark spots, and support hydration.

## BENEFITS

- Targets pigment at the melanin pathway
- Accelerates cell turnover
- Improve skin texture + refined pores

## TREATMENT STACKING

Best incorporated into a brightening facial: try Oxy Bright Facial, Oxy Bright Facial Adv

## OPTIONAL MODALITIES

Cryofacial Device

## RESOURCES

[Ingredient Power](#)

[What is a Tyrosinase Inhibitor](#)

## BACKBAR COST

Approx \$4

## BEFORE | DURING | AFTER

### **Pre-Care**

Caution on melanin-rich skin when using Oxy Peel. Pre-treat with tyrosinase inhibitors for 6 weeks beforehand.

### **In Treatment Experience**

Peeling step may tingle or itch, both of which are normal.

### **Post Treatment Care**

Do not exfoliate for 7 days  
Recommended homcare includes Corthe's Brightening Line

### **Treatment Cadance**

2 Weeks

## PRODUCTS NEEDED

Corthe Foaming Gel Cleanser  
Corthe Oxy Peel  
Corthe Bright C Ampoule  
Corthe Brightening Cream  
Pfect-A Solar Elixir

## CONTRAINDICATIONS + CONSIDERATIONS

This protocol is not suitable for those who are pregnant, have broken skin, dermatitis, sunburn, or allergic to any of the ingredients within each formula.

Caution on melanin-rich skin when using Oxy Peel. Pre-treat with tyrosinase inhibitors for 6 weeks beforehand.

## PROTOCOL

# CLEANSE + PREP

Prepare skin by cleansing with Corthe Essential Foaming Gel Cleanser

# TREATMENT STEPS

1. Apply Corthe Oxy Peel with gauze or brush. Apply up to 3 layers. Leave on for up to 5 minutes total. Do not wait between layers.
2. Remove the peel by cleansing with the Corthe Foaming Gel Cleanser.
3. Continue on with facial or finish treatment.

# FINISHING STEPS

Apply Corthe's Bright C Ampoule and Brightening Cream and SPF of choice.
